

## **Contractor picked for Prairie State Project**

Quality Testing and Engineering Inc., of O'Fallon, IL. And Wentzville, Mo., has been chosen to test the field construction material at the Prairie State Energy Campus in Washington County, IL.

The testing is part of a general grading package involving 1.5 million cubic yards of ground. W.B. Koester is the general contractor for the grading project.

Bechtel Power Corp. has been contracted to oversee the construction and the plant should be operating in 2012.
